Preparation, Polymerization, Catalysts.

Two methods of preparing polyethylene oxides were
developed: by polymerization of ethylene oxide in an
autoclave under pressure and by bubbling gaseous
ethylene oxide through alkaline solutions of the glycol
in apparatus of the column type. The composition of
the polyethylene oxides and their properties are de-
termined principally by the ethylene oxide : water and

DESCRIPTIONS: *Geography, *Economics, *Urban areas, History, Commerce, Transportation,

Odesa's advantageous economic-geographic situation has played a positive role in all phases of the city's development. It has promoted Odesa's pre-eminent place as a foreign trade center and its function as a key element in the geographical division of labor. The situational advantages of the city should be taken into account in any historical-geographic study and in insuring more rational economic relations between the city and the rest of the Soviet Union.
